

HTML Text Formatting Elements

Text formatting is an essential aspect when it comes to designing professional web pages. There can be requirements to add bold text, italic text, text in bigger sizes, smaller sizes and in many other styles.

HTML Formatting elements were designed to display special types of text as indicated below:

`` - Bold text

`` - Important text

`<i>` - Italic text

`` - Emphasized text

`<mark>` - Marked text

`<small>` - Smaller text

`` - Deleted text

`<ins>` - Inserted text

`<sub>` - Subscript text

`<sup>` - Superscript text

Now let's see how can we format text using the `` tag, `<i>` tag, `<sup>` tag, `<sub>` tag and the `<small>` tag. Here you can edit the code and see the output in the result pane.
